

Welcome to the Harvard Association of South Africa

The Harvard Association of South Africa and this website are dedicated to the North American Aviation AT-6 Harvard aircraft that have carried South African registrations, both civil and SAAF, South African Air Force.

The idea of the Harvard Association of South Africa and this website is to provide a comprehensive resource of data and photographs tracing the histories of the North American Harvards that have plied their trade in South Africa.

Comments, advice and contributions will be most welcome.
